Your Online Training Platform

Flexible Learning in the Cloud – Focus on Security

Create courses easily, manage academy members, track everyone's progress and results, and give feedback – these are just some of the ways you can use your Online Training Platform in the cloud.

A cloud solution, software-as-a-service, provides the necessary flexibility in training dissimilar participant groups, like employees, customers and partners. Learn and edit content anytime, anywhere. Additionally, take advantage of hassle-free secured system hosting, safe data-backup and application maintenance while keeping up-to-date continuously with the latest technology development.

Advantages of a Software-as-a-Service Online Training Platform:

✔ **Online log-in**
No need to install software on servers or on computers. You just log in online and you are set to go.

✔ **Access on-demand**
Train and manage courses on any device, whenever the need arises and wherever you are.

✔ **All inlcusive**
Support, maintenance and development cutting edge are part of our regular services.

✔ **Scalability**
Add new participants and trainers without extra charge. The platform accommodates unlimited users logging at the same time.

✔ **Up-to-date information**
Easily update trainings after publication and let participants access the newest version of any training.

Coursepath Services for Security and Data Protection:

✔ **EU-Hosting**
Our services are hosted by ISO 27001 certified provider Cyso in Amsterdam, the Netherlands.

✔ **Secured Servers**
Our servers are protected round-the-clock by the latest firewall technology.

✔ **Personal Data Protection**
Personal data are viewed only with your consent and not passed on to third parties.

✔ **Availability**
A redundant system and continuous backup ensures all-time access to data and your trainings.

✔ **Encrypted Data Exchange**
Data are transferred via Secure Socket Layer (SSL) cryptographic protocol designed to provide privacy and data integrity.

✔ **Defined roles and permissions**
The platform has a clearly defined user role and permission structure to guard data and access.

✔ **External Security Controls**
A team of specialized security companies inspects our services regularly.
